PROFESSIONAL SUMMARY

AI/ML engineering student at BMS College of Engineering with a proven track record of shipping production-grade AI applications and full-stack platforms end to end — from concept and UI design through development and deployment. Combines strong ML/LLM fundamentals with hands-on full-stack experience across three self-driven products and three live client sites, delivering real-world impact for NGOs, businesses, and startups.

TECHNICAL SKILLS

Languages: Python, Java, SQL, HTML, CSS

Development: React, Node.js, FastAPI, REST APIs

AI / ML: Machine Learning, Natural Language Processing, Generative AI, LLM Integration

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, GitHub, Linux, Netlify, GitHub Pages

Other: UI/UX Design, Full-Stack Development, Web Development

PROJECTS

NIRVAH — Community Donation & Resource Coordination Platform

React · Node.js · REST APIs · JWT

- Architected and built a full-stack platform connecting donors, NGOs, and organizations to coordinate donation and redistribution end to end — spanning listing, matching, claiming, pickup, delivery, and impact tracking.
- Engineered secure, role-based authentication with email verification and password recovery, and designed the system architecture for scalability across NGO verification and corporate surplus reporting workflows.

Live: nirvah.cc.cd

EDEN — AI Personal Productivity Assistant

React · AI/LLM APIs · Browser Notifications · Weather APIs

- Built an AI-powered productivity assistant unifying conversational AI, daily planning, task management, reminders, and live weather context into a single, cohesive workspace.
- Designed and implemented both AI-assisted and manual task/reminder creation flows, optimized for proactive, personalized productivity.

NEURASPACE — Interactive AI Experience

React · AI/LLM APIs · Vite

- Designed and developed an interactive, AI-driven digital experience with polished, animated UI transitions — blending product design, frontend engineering, and applied AI functionality.

Live: neuraspacespace.online

PROFESSIONAL EXPERIENCE / CLIENT WORK

Website Development — Independent / Client Projects

Designed and delivered production websites for businesses and brands end to end — from visual concept through frontend development and deployment.

Rajamma Engineering Pvt. Ltd. rajammaengineering.in

- Developed a professional digital presence for an engineering and machining company, structured around industrial capabilities, service offerings, and business enquiries.

The Levan thelevan.in

- Designed and developed a full e-commerce website for a Chennai-based streetwear brand, with a strong focus on brand identity and product presentation.

EDUCATION

B.E., Artificial Intelligence & Machine Learning

BMS College of Engineering, Bangalore | 2024 – 2028

Relevant Coursework: AI, Machine Learning, Data Structures & Algorithms, DBMS, Operating Systems, Statistics, Mathematical Modelling, NLP, Data Science

RESEARCH & ADDITIONAL

Certifications: Google Cybersecurity Professional Certificate (Coursera); AWS Job Simulation (Forage)

Research: A Survey of Malware Detection and Analysis — examined approaches for identifying malicious software and applying intelligent, ML-driven techniques to cybersecurity

Languages: English, Tamil, Hindi, Kannada

Interests: AI, Machine Learning, Product Development, Cybersecurity, Software Engineering, UI/UX

Additional Experience: Independent product development, e-commerce development, WordPress, PHP, UI/UX design
